

Bike Racks:

**Good for the City,
Good for Business!**

Why have a bike rack for my business?

- More bike racks mean less bike parking on trees and private fencing, helping beautify the street.
- More bicycles parked per vehicle parking space means more potential customers.
- Bike racks encourage bicycle use, which:
 - Decreases vehicle emissions, making our air cleaner
 - Helps our community stay physically fit
 - Decreases traffic congestion on our streets

FixCity.org Bike Racks is a community-based effort to add more official New York City bike racks in Williamsburg and Greenpoint. For more information, visit <http://www.fixcity.org>, or email info@fixcity.org. This project is sponsored by:

Transportation Alternatives Brooklyn Volunteer Committee
